↓ ADAPTING TO YOUR NEEDS

ZERO WASTE, SAVE EARTH

Mr. Ashvin Pansuriya
Chairman and managing director

From the Desk

Sustainability remains the number-one topic across the packaging value chain, with corporations setting ambitious targets to improve their performance. High disposable incomes and changing lifestyles have led to the increase in the consumption of packed goods and e-retailing channels, which in turn drive the demand for protective packaging. Moreover, with increasing awareness about environmental hazards, the market is adopting technologies to develop sustainable protective packaging, which is environment- friendly. India is estimated to grow faster than any other country because of its strong economic growth along with increase in internet shopping and rapid urbanization.

Protective packaging, be it rigid or flexible is projected to be one of the fastest growing product type segment globally. Apart from packaging, it is a known fact that a considerable amount of energy utilised in industries, residences, corporate offices, educational institutes & many other places is lost due to inappropriate insulation, which eventually slows down the overall economic development. This situation is very alarming, and we took an initiative towards the conservation of energy and thus contribute towards the global growth by giving the society the right product (XLPE) in 2015 for conservation of energy. We took a step forward in assisting our customers

in protective covering segment by manufacturing Cross Laminated Tarpaulins since 2022.

We have been successful in manufacturing 14 varied products in flexible & rigid packaging, insulation and abrasive segments. As a strategic decision, in order to cater to all the manufacturers in Automobiles, Electronics and White goods, we have started our fabrication & converting factories in the proximities of all these manufacturers for Just in Time supply targets.

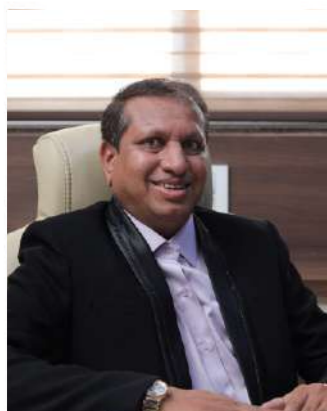

I take this opportunity to thank our valued customers & suppliers, whose continued patronage and confidence in our product inspires us to extend the best of services and enables us to provide value for their money.

We are committed to total customer satisfaction by identifying their specific needs, translating them into Quality products and providing dependable after sales services. This commitment is the corner stone of our Quality Policy and we strive to achieve this goal through our strength- Goldcoin Team; and seek their continuous involvement in achieving the company's objectives. I therefore, seek continued patronage of our valued customers, suppliers, cooperation of our Goldcoin Team thanks our well-wishers who have contributed towards the growth of our organisation.

AS. Pansuriya

Our team members

Start small...
Think BIG!!

Mr. Mahesh Pansuriya

Director - Finance

Mr. Mahesh Pansuriya has gained expertise in controlling the whole financial aspects for the entire Goldcoin Group. He has been responsible for financial planning, funds allocation, budget approval and raising funds for upcoming projects. He is the backbone for the Group as his effective and efficient expertise in handling all the incoming and outgoing funds has enabled the Group to witness a stupendous growth over these years without facing any financial glitches.

Mr. Ramesh Tilara

Director - Projects

Mr. Ramesh Tilara is one of the founder members of the Group. With his vast experience of more than 3 decades of handling new projects has mastered him in project implementation, execution right from construction of new plants, machine mobility and commissioning. With his support and hands on experience, the Group is inching ahead with smooth and efficient operations. He is also responsible in developing some customised equipments and machines for secondary operations for some specialised applications.

Mr. Chetan Mehta

Group CEO

Mr. Chetan Mehta qualified Plastics Engineer and a Packaging Technologist and with a rich experience in handling various machinery and projects has given him an upper edge in Product Research & Analysis and working on project feasibility. After travelling globally and having attended various conferences and exhibitions, his prime responsibility lies in new product identification, suiting to domestic and global markets and selecting right kind of machinery & equipments. He is also responsible in handling some key overseas customers.

Mr. Bharat Vedia

Director

Mr. Bharat Vedia based in Thailand, handles 2 manufacturing plants in Thailand for similar range of products manufactured in India and also one plant for manufacturing specialised masterbatches and additives for engineering and commodity polymers. Also, with his vision and having travelled across the globe, he imparts a lot of inputs in terms of new development in various parts of the world.

Mr. Lalit Pansuriya

Director - Procurement

Mr. Lalit Pansuriya has an experience of more than 25 years in sourcing spares and accessories from various parts of the world and he is solely responsible for all the electronics, mechanical and electrical components required in any of the machines in our factories. With his expertise and contacts the Group saves on machine downtime drastically and thereby improving the overall productivity.

Mr. Henil Pansuriya

The second generation entrepreneurs has proudly joined our esteemed group since 2023, right after their graduation. Their invaluable contribution to the group lies in harnessing their extensive knowledge to drive the overall growth of our organization. they will be assisting the group in establishing efficient systems, overseeing financial matters, and ultimately propelling our group towards new horizons. Together, we aim to position our group as a formidable presence on the global platform.

Ms. Aayushi Pansuriya

Ms. Henisha Pansuriya

Vision

To offer products which are sustainable and recyclable and to create a positive impact by working towards reducing the waste generation, improving the recyclability, and thus eyeing towards protecting our environment and conserving the natural resources.

Mission

- 01** To cater cost effective, well tailored and top quality Plastic Packaging products to our customers.
- 02** To become a single source manufacturer and supplier in Packaging, Abrasives & Insulation segment.

Values

“Growth is never by chance, it is a result of forces working together”

Aim towards sustainability

Continuous product development

Maintaining the quality standards

Fulfilling customer's expectations

The Journey of Goldcoin Group of Companies

The journey of Goldcoin Group began in 2005, when the founder members Mr. Ashvin Pansuria & Mr. Ramesh Tilara lead the foundation stone for the company Goldcoin Foam Pvt. Ltd. In such a brief span, with the support & dedicated hard work put in by the team of more than 1000 workforce & of course with a strong vision & conviction from Mr. Ashvin Pansuria, the Group has attained greater heights. To add to it, we have Mr. Chetan Mehta who has joined us as Group CEO since 2014 who is a Plastics Engineer & a Packaging Technologist.

The Group has expanded its manufacturing to 15 different products mainly in protective packaging & insulation. The Group is ISO 9001:2000 Certified & HVAC Certified.

Presently with 9 manufacturing facilities, 13 fabrication units, 1 trading houses & 1 marketing Office, the Group is marching ahead with a jet speed and the growth is inevitable. With the above setup, we have diversified ourselves and have been successful in manufacturing following products with the highest quality standards:

- | | | |
|--|--|--|
| 01 EPE Foam Rolls & Sheets For Packaging & Mattresses | 06 Thermbarrier Tubes | 11 Kraft Paper Corrugated Box |
| 02 PE Fruit Nets For Fruit Protection | 07 Bubble Floor Protector Sheets | 12 Xlpe Chemically Cross Linked Foam For Thermal Insulation |
| 03 PE Rods & Tubes For Expansion Joint And Insulation | 08 Stretch Films For Protection Wrapping | 13 CPP Films For Flexible Packaging In Food |
| 04 Multi Layers Cross Laminated Tarpaulin | 09 Household & Industrial abrasive pad and wheels | 14 Wooden Pallet & Boxes |
| 05 Pp Hollow Sheets For Packaging & Printing | 10 Air Bubble Films For Packaging | |

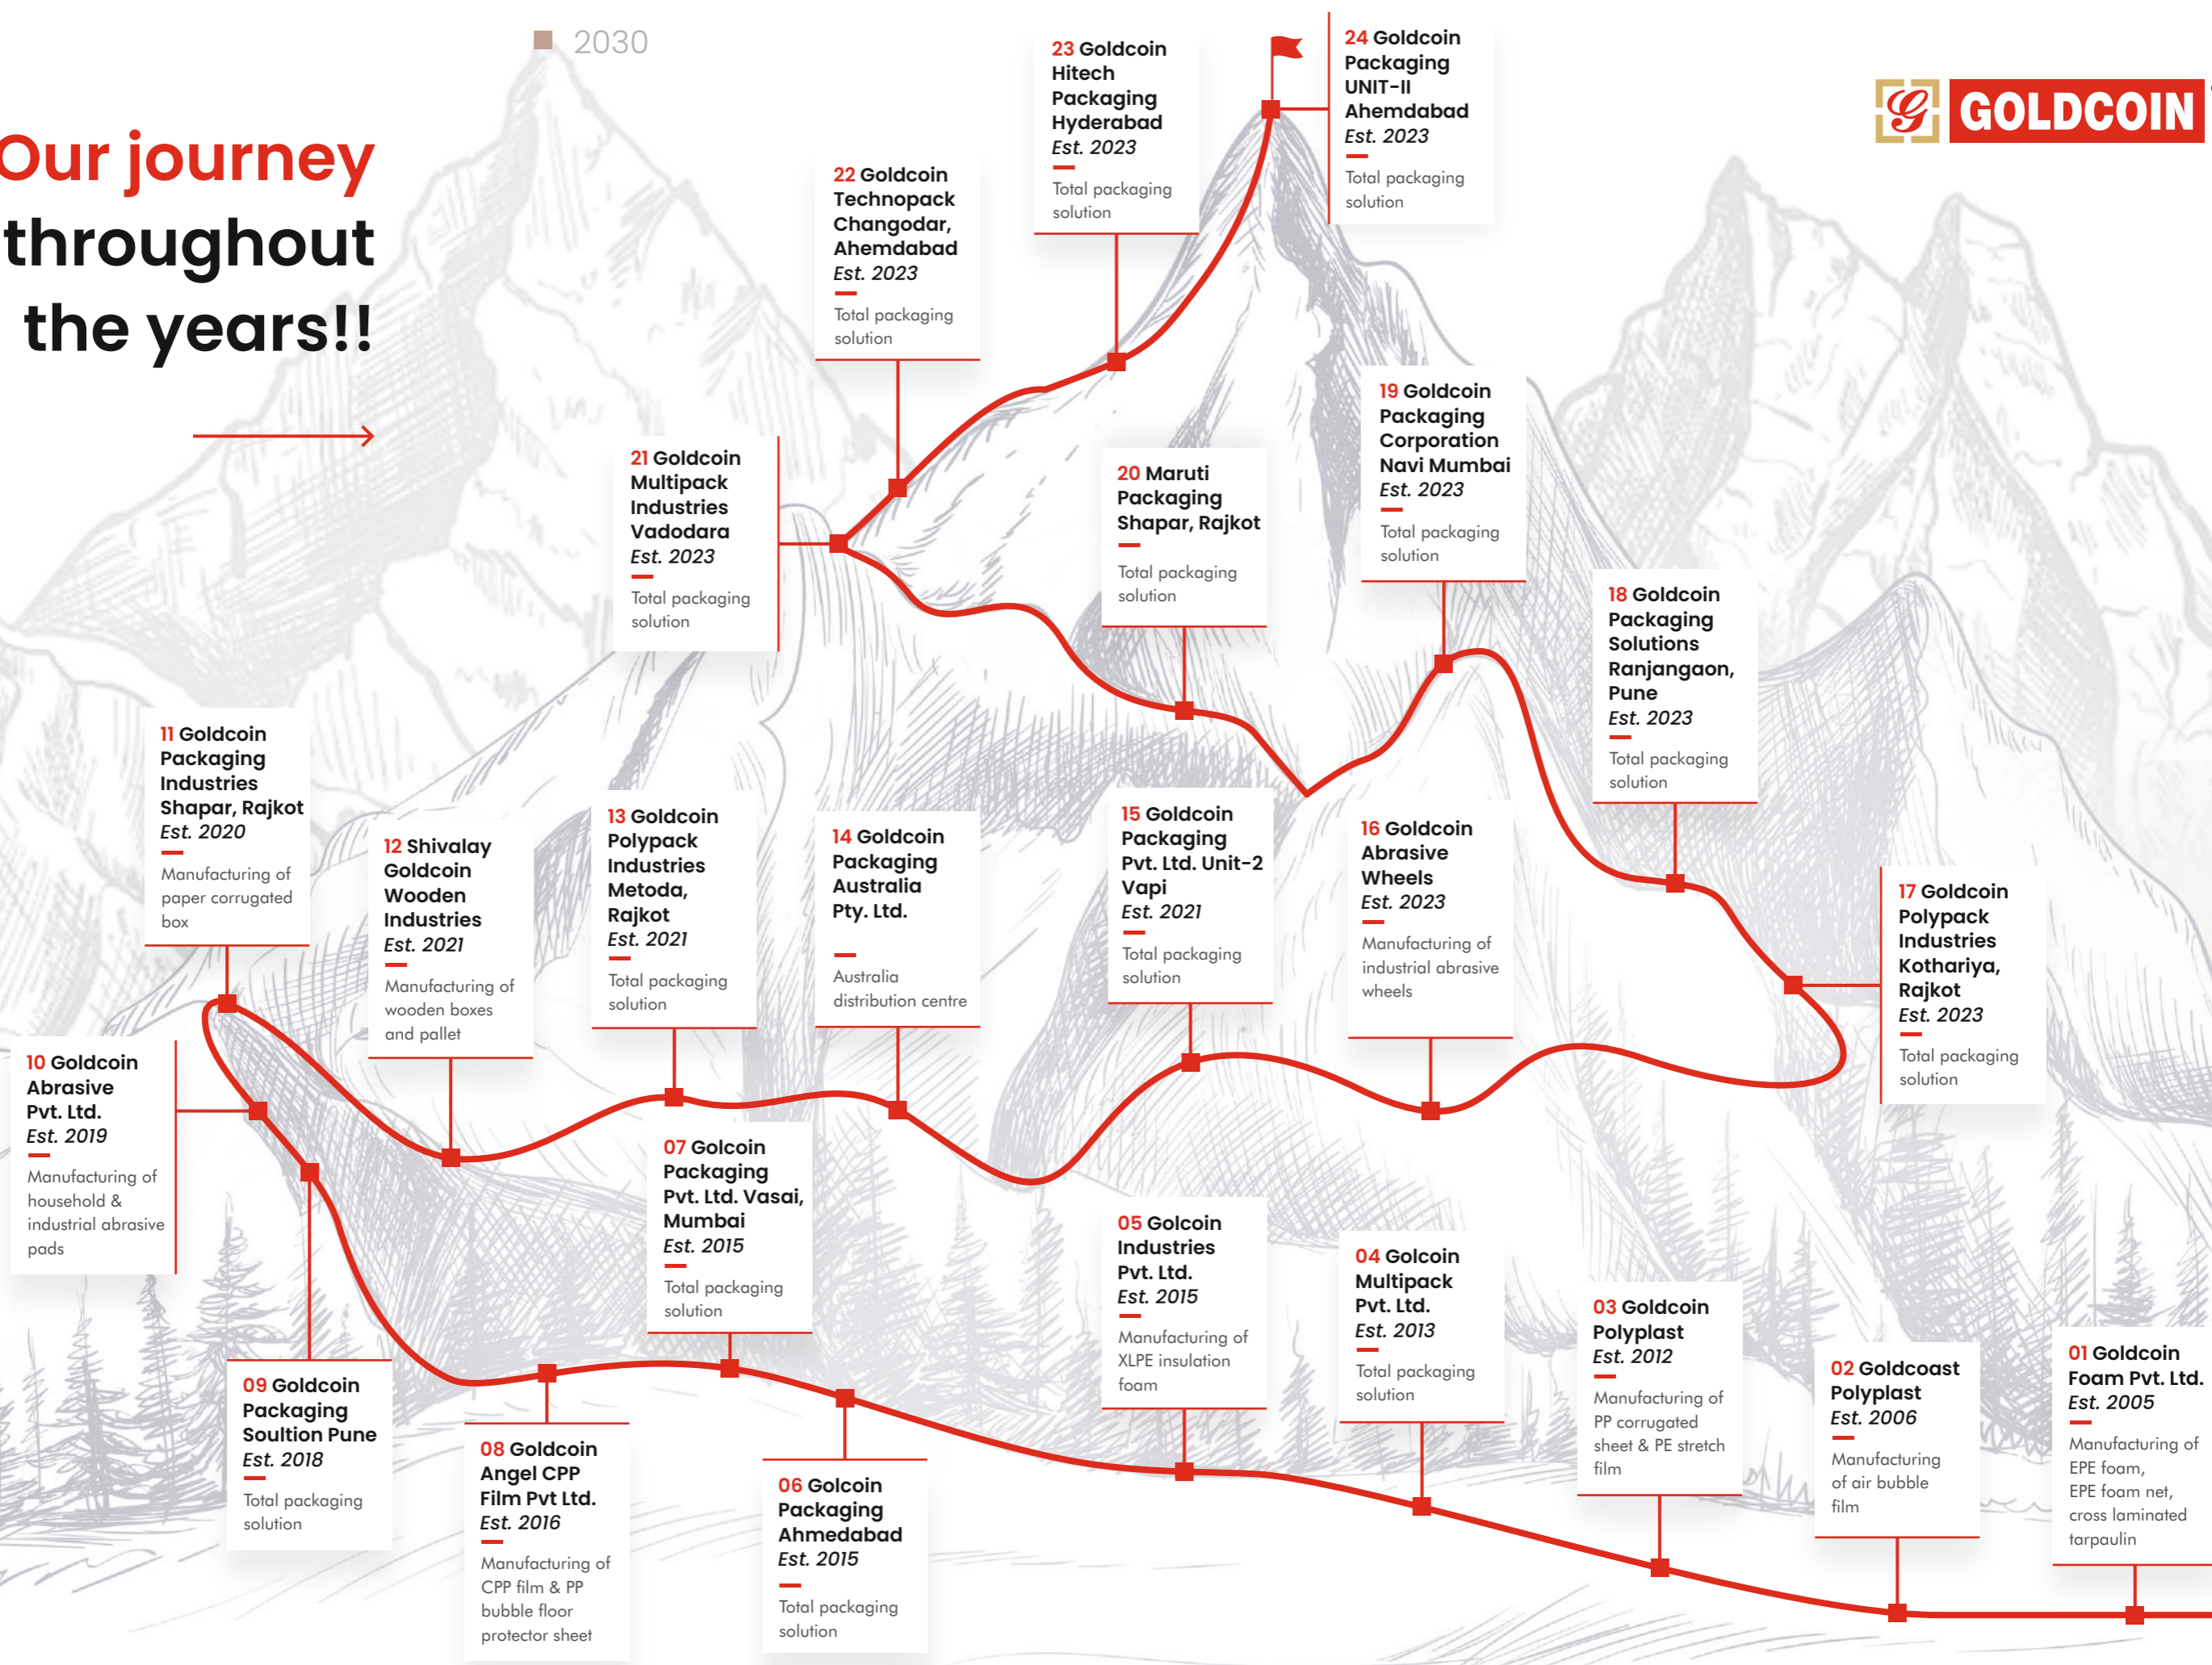

Apart from strong market share in India, the Group exports its products to countries like USA, Australia, New Zealand, United Kingdom, Sharjah, Dubai, Qatar, Thailand etc.

Also, the Group has a full-fledged warehousing company in Australia, which takes care of Australia, New Zealand & Fiji. The Group's growth since inception has been phenomenal, thanks to the dynamic & progressive management. The driving force behind the success has been enthusiasm in exploring new products.

The Group has latest manufacturing facilities with all State of The Art extrusion lines mainly from the most reputed manufacturers located in different parts of the world. We pledge to offer the best quality products to all our customers, with continuous quality improvisation. We are growing

Our journey throughout the years!!

Product Range

No.	Property
01	0.85mm to 5mm single layer roll
02	5mm to 40mm multi layer roll
03	15mm to 150mm multilayer sheet
04	Natural EPE foam roll & sheet
05	Antistatic EPE foam roll & sheet (As per customer requirements)
06	Fire retardant EPE foam roll & sheet (As per customer requirements)
07	EPE foam with HM HD film laminate roll (As per customer requirements)

Features

- Resilience
- Cushioning
- Shock absorption
- Flexibility
- Abrasion
- Resistance
- Light weight
- Soft and tough
- Ease of fabrication / lay
- Water / Moisture resistant
- Chemically inert
- Oil resistant
- Non toxic
- Hygienic & Fungal resistant
- Sound / Vibration dampener
- Wider temperature range
- CFC free

Application

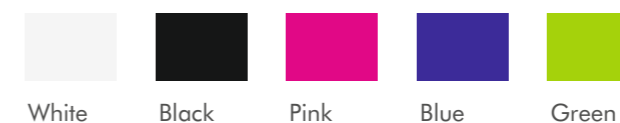

Ceramic products and sanitary wares • Electronic equipments • Handicrafts • Submersible pumps • Insulation • Automobiles • Marine • Construction • Jewelry packing • Toys & novelties • Mattress • Packaging • Fabrication • Buffers • Mandap decoration • Furniture industry • Roofing • Carpet & mats • Sports • All type of bags, Shoes, Flooring, Cold storage, Tent house, Bus Seat

Features

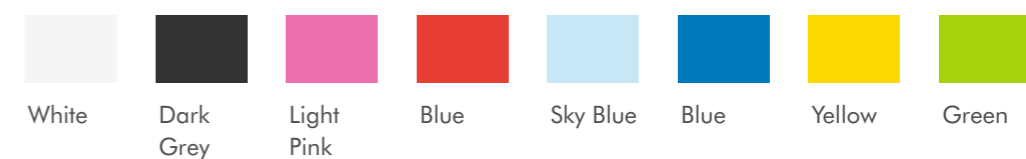

- Protection & decoration of your products
- Flexible and easy to use
- Hygienic and non toxic
- Economical and reusable
- Goods, especially suitable for fruits, bottles and other fragile products
- Make your fruits more eye catching, neat and exclusive
- Size and colour customisable
- Soft, light weight

Application

Fruit packaging • Vegetable packaging • Packaging of glass bottles

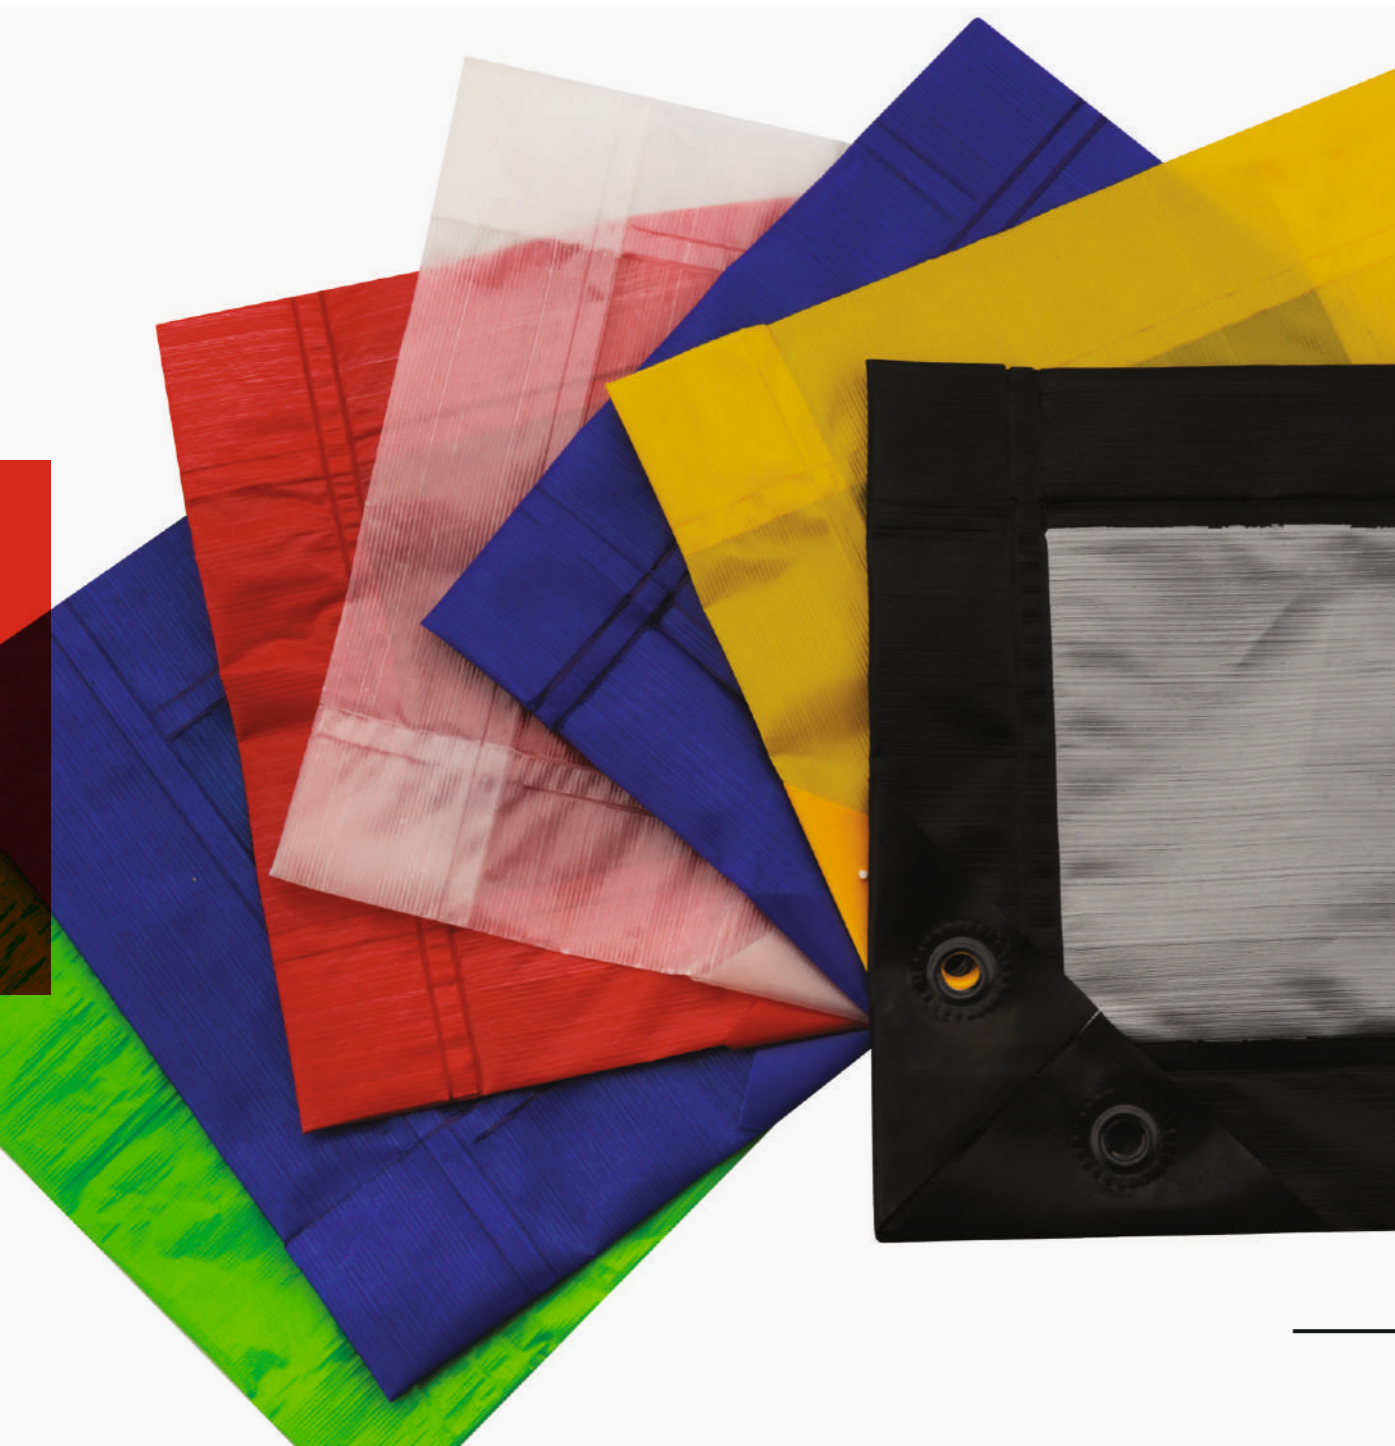

Available Colors

03 | Multi Layer Cross Laminated Tarpaulin

Essential Characteristics

- Manufactures with high standard parameters and close tolerance
- High tensile strength & puncture resistance in multi direction
 - 100% waterproof with good barrier property & moisture resistance
 - Chemical resistance to acid, alkalis, stain, oil etc.
 - Thus making it extremely convenient to handle & use light weight
 - UV treated to resist harsh radiations
 - Tough & durable with strong aluminium eyelets
 - Fire retardant as per customer requirements
 - Rot proof
 - Heat sealed joints, thus protecting from any leakage
 - 100% recyclable and thus environment friendly

Available Range of Multilayer Cross Laminated Tarpaulin

GSM / Thickness

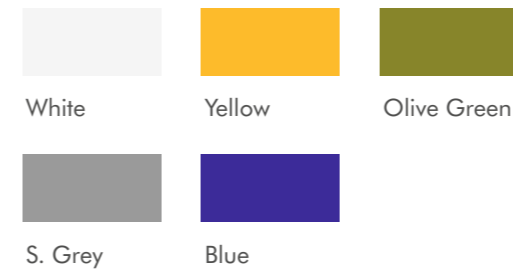

70, 90, 100, 120, 150, 200, 250, 300, 350 GSM & Above

Sizes

Goldcoin Tarpaulin offers a wide range of size and also long size which can be fabricated to a custom-made size as per customer's need.

Colour

Any colour our standard colour are

Market Shelter

Boat Cover

Round Tanks

Agricultural

Goldcoin Tarpaulin has wide use for agricultural applications. Available in variety of sizes and can also be made available in customized sizes.

Fast & Effective Drying Using Tarpaulin

01 — Drying of Agriculture Products Such as

- Spices • Chillies • Areca nuts • Coconut
- Turmeric • Grapes • Rubberized items, etc.

Cover Fresh Harves, Protects Freshness

02 — Silage and Grain Covers

Goldcoin Tarpaulin protects goods from air and water intrusion and reduces loss of moisture, retains freshness and preserves nutritional values.

Tarpaulin Fumigation Cover

03 — Fumigation Barriers

Goldcoin Tarpaulin can also be used as a containment cover to maximize and economize fumigation process as it has good barrier property that prevents easy escape of fumigated gases and provides good impact.

It also has lower VOC emission into the atmosphere.

Tarpaulin - Poultry Curtains

04 — Poultry curtains

Goldcoin Tarpaulin is used as poultry curtains to protect chickens from extreme weather, heat, cold or rain.

Tarpaulin Vermibeds

05 — Vermibeds

is a process of managing worms to convert organic matter / waste to rich manure in a short period of time. To facilitate vermi composting, a suitable ambient temperature must be maintained and must avoid heat build-up as the earthworms are sensitive to heat. Use of Goldcoin Tarpaulin for vermibeds presents immense advantages as it helps in temperature control.

Tarpaulin Pond Liner

06 — Pond Liner

Due to vagaries of rainfall, Government is encouraging and supporting water conservation and storage. One of the most popular method is by creating artificial pond / storage reservoir. Goldcoin Tarpaulin offers excellent solution for it as it has high resistance to puncture or tear, light weight and is rot resistance.

**Tarpaulin - Containment Cover**

07 — Effective Landfill Covers

Due to high gas barrier and water barrier, Goldcoin Tarpaulin can also be used to cover landfill, etc. as it prevents odour/gas from spreading.

**Green House Cover**

10 — Green House

Goldcoin Tarpaulin in green houses provides optimal protection against heat, cold or heavy rains. Special ingredients and design provide light transmission that is indirect or defused with equal light dispersion due to special additives used while it prevents harmful UV rays.

**Tarpaulin used as Cotton Cover**

08 — Covers

Goldcoin Tarpaulin is puncture and tear resistance ideal for cover.

**Excellent Waterproof Barrier for
Civil / Constructions**

11 — Civil Engineering

Goldcoin Tarpaulin is an ideal material for use as a waterproof layer in civil engineering / construction.

As it prevents moisture / vapour migration through concrete slab.

**Large Cargo Covers offers
Excellent Protection**

09 — Industrial & Transportation Covers

Goldcoin Tarpaulin can be used as a wrap film / cover to protect cargo from dust, moisture and minor scratches.

**Tarpaulin to Protect Timber /
Logs from Extreme Weathers**

12 — Lumber Cover / Timber Pack

Lumber wrap is a special film which blocks sun rays and prevents heat build-up. Goldcoin tarpaulin Prevents condensation and staining of wood.

Clever Protective Cover

"TO SAFEGUARD MOST VALUABLE PRODUCT"

Features

- Durable high strength material
- Dual seal joint
- Highest international standards put through rigorous testing

Customization

Made as per your requirement
(Size, Colour, Thickness..)

Gardengrow Bags

The garden grow bags are soft, light and durable bags with High resistance to puncture and tear Low coefficient allows easy, fast and safe moving of plants. Moisture from plant bag can easily drain out and the air is able to circulate around your plant and its roots

Different Sizes

- 20.5 Ø X 1 Ft
- 40 Ø X 1 Ft
- 12 Ø X 1 Ft

Quality and Standards

It is made up of specifically chosen polymers and MFG by Higher quality of workmanship and technology. It is manufactured as per ISI Standard 14611-2016(Multilayer Cross Laminated Tarpaulin)

Technical data sheet of multilayer cross laminated film as per is standard.

No.	Characteristics	Requiements

Goldcoin Polyplast

Goldcoin Polyplast is a group company of the renowned Goldcoin Group, that delivers quality protective packaging products. Goldcoin is the ultimate packaging solution that provides services in domestic as well as in international markets.

Equipped with complete know-how, Goldcoin Polyplast manufactures PP Profile Hollow Sheets, PE fabricated products and boxes.

05 | PP FLUTE BOARD

Goldcoin PP flute board is available in eye catching attractive colours and shades. PP Flute board is printable and available in Matt & Glossy finish. Goldcoin PP flute board is reusable due to better hinge strength and stiffness, hence more economical. "PP FLUTE BOARD" is a versatile material for packaging of industrial as well as consumer goods including kits of electric and electronic items, tools, glass wares, textiles, shoes, medical kit and sample kit for tiles and many more.

Features

- High strength rigidity
- Chemically inert
- Attractive colours
- Excellent puncture resistant
- Excellent compression strength
- Easily fabricated as per customer requirement
- Weather resistant
- Non toxic
- Washable, Lightweight & Reusable

PP Flute Board Available Range

Thickness	: 2mm to 10mm, 12mm
Width	: Upto 2440mm as per customer requirement
Colours	: Yellow, White, Blue, Gray, Green, Red, Black, Orange and as per customer requirement

PP Flute Board Special Grades

Anti static	: For sensitive electronic components
Conductive	: For active electronic components
U.V. Stabilised	: For prolonged outdoor application
Fire retardant	: For construction & interiors

PP Flute Board Application Area

Advertising	: Signage, POP, Hoarding, Display, Boards, Exhibition stall
Packaging	: Master cartons, Packaging for fruits, Vegetables, Glass, Delicate items, Chinaware, Lab ware, Auto parts, Electrics & Electronics, Pharmaceuticals etc.,
Construction	: Porta cabins, Doors floorings, False ceilings, Protective liner for wardrobe & Furniture paneling
Other	: Lab furniture, cooling towers, Pellets, Roofing for green house, Novelties, Boards for Rular / Propaganda vans

Available Colors

PP FABRICATED PRODUCTS

We are passionate about providing the best PP products to our clients. For us, polypropylene is versatile and perfectly suited for just about any application.

We have a full fabrication facility in house to convert sheets into customized fabricated products. These products are manufactured with durable materials sheets and specifically designed for multiple trips and extended life. They are durably made to support multipurpose uses without the impairment of protective features. The term returnable is also used interchangeably. It includes returning packages or components other than recycling, disposal, incineration, etc. Our fabrication facility include platen punching and flatbed die cutting machines, roller cutting, ultrasonic welding, riveting, edge sealing.

06 | PE STRETCH FILM

Goldcoin Cast Stretch Films protect your products from scratches, abrasions, stains and other damage and ensure that they reach your customers as good as new. Our Cast Stretch Films can be used for variety of loads and can help create load securization for your goods in transit.

Benefits of cast stretch films

- Protect against moisture, dirt and micro particles safeguarding the goods
- Easy to remove as it doesn't use any additional adhesive
- High clarity / Transparent

Machine Grade Roll : Superior load retention to reduce shifting and movement. Excellent puncture resistance with better protection and cleaner film. Suitable for conventional and power pre stretch machine wrapping of palletized goods.

Hand Grade Roll : Lightweight and easy to use. Manual wrapping of palletized wood, bricks, paper and other industry products.

Advantages of Goldcoin stretch film

- Stretch film protect against moisture, dirt and micro particles safe guarding the goods.
- Easy visible / Transparent.
- Easy to remove as it doesn't use any additional adhesive.

	a. Smoke density rating Light absorbtion	6.5%			
	b. Maximum smoke density Light absorbtion	13.1%			
13	Tensile strength, MPa				BS4370 Part 2 : 1993
	a. Longitudinal direction	5.5			
	b. Transverse direction	5.5			

Insulation

Application

Air duct and pipe insulation for cooling, heating and refrigeration pipes, insulating wrapping, impact sound insulation, air conditioning parts, Building and construction, automotive and industrial

Advantages

- Low thickness for efficient anti condensation
- Low thermal conductivity
- High resistance to water-vapour diffusion (no capillary effects)
- High elasticity and flexibility
- Lightweight / easy to install
- Environment friendly

Construction

Application

Gasket taps, padding for remote heating, corrugated panel seals, screed floors, joint fillers, parquet underlay, corrugated roof insulation, tunnel insulation, membrane protection, etc.

Advantages

- Excellent thermal insulation
- High elasticity
- Low water absorption
- Highly scratch-resistant
- Highly stable over time
- Good impact sound insulation

Sports and Leisure

Application

Sport shoes insoles and inners, camping mats, sports and gymnastics mats, swimming board, seat cushions, life jackets, swimming accessories, toys, helmet lining, shoulder pad and backpacks.

Advantages

- High elasticity
- Low water absorption
- Friendly to skin
- Easy to clean
- Long service life
- Soft and comfortable
- Non toxic
- Multiple colors

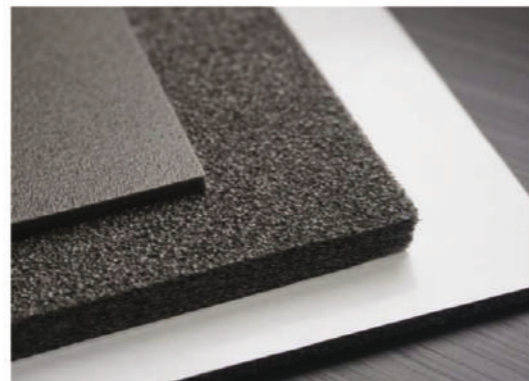

Acoustics

Application

It is used in sound insulation in projects to minimize noise of generator and compressor enclosures. It is also used in theaters and sound studios, also in construction projects and air ducts.

Advantages

- Lightweight
- Sound absorption
- Energy efficient
- Improved productivity
- Environment friendly

Automotive Industry

Application

For moulded and stamped parts used in interior cladding, e.g. linings for wheel arches and car boots, door insulation seat covers, insulation for heating and air conditioning, etc.

Advantages

- Lightweight
- Excellent insulation
- Totally acceptable ecologically
- Outstanding thermoforming behavior
- Thermal insulation
- Shock proof
- Lightweight
- Weather resistant

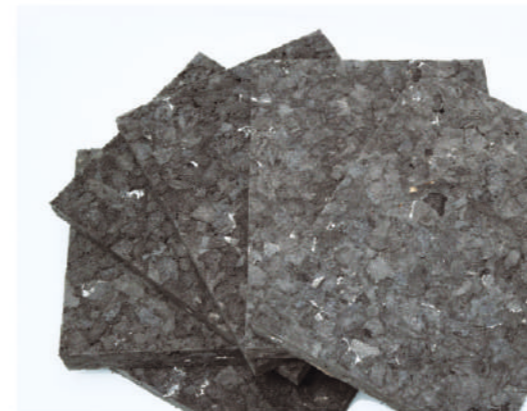

Packaging

Application

Packaging interlayer, reusable packaging for the motor and electrical industries, load-carriers, corner protection, outer packaging, tray holder, distance holder, etc.

Advantages

- Very good forming behaviour
- Clean and easy to use
- Excellent padding qualities
- Excellent recovery
- Lightweight
- Multiple re-use

Rebonded foam

Application

Mattresses, Sofa cushions, Gym mats, Automotive seating, Sound proofing, Packaging.

Advantages

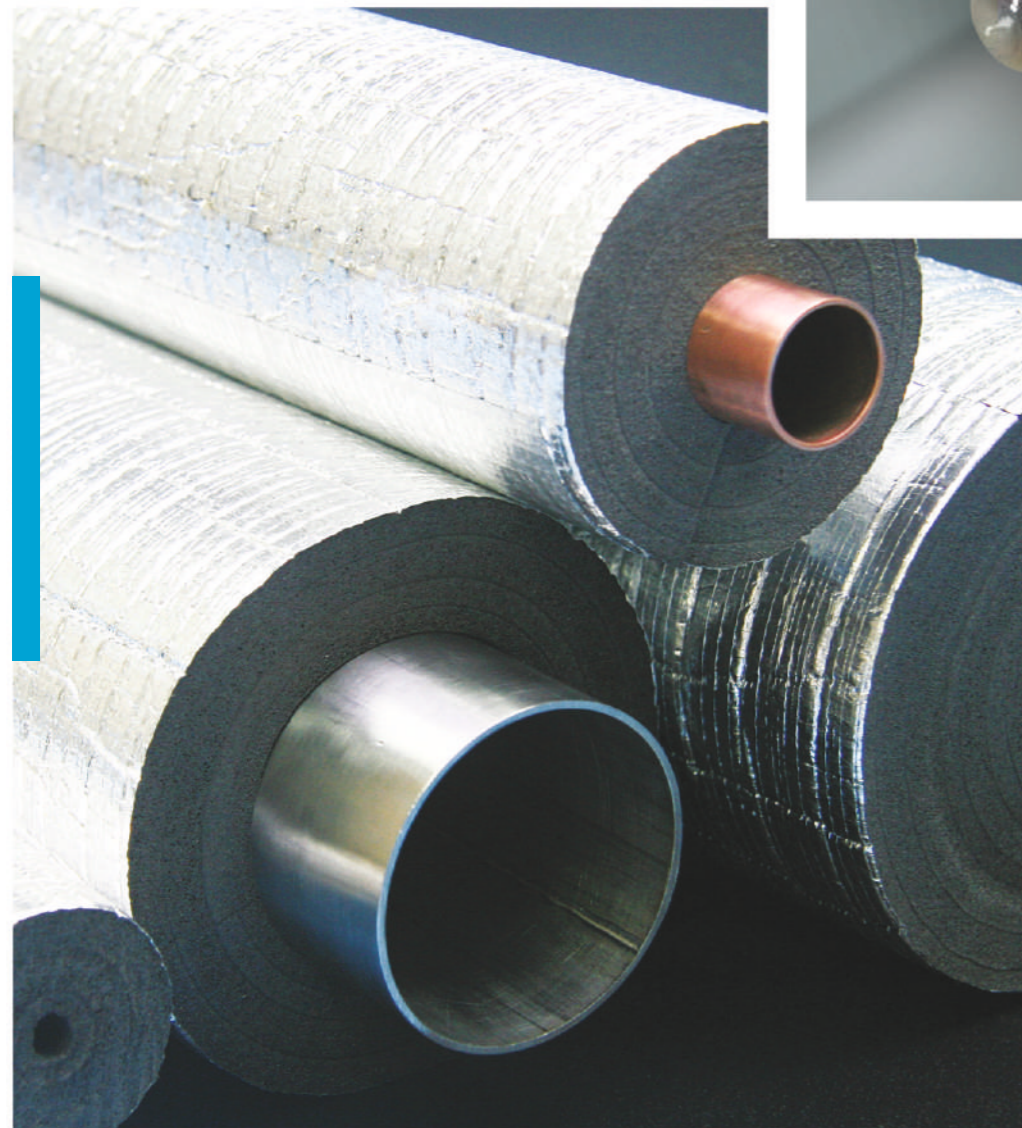

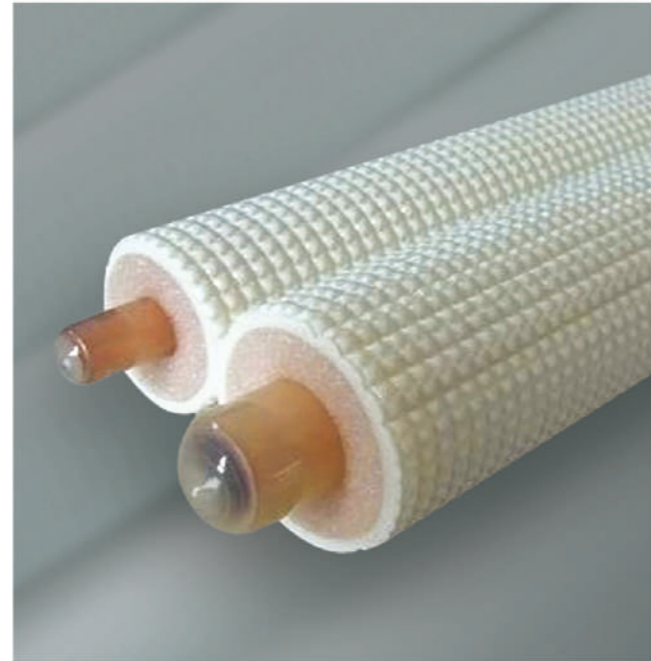

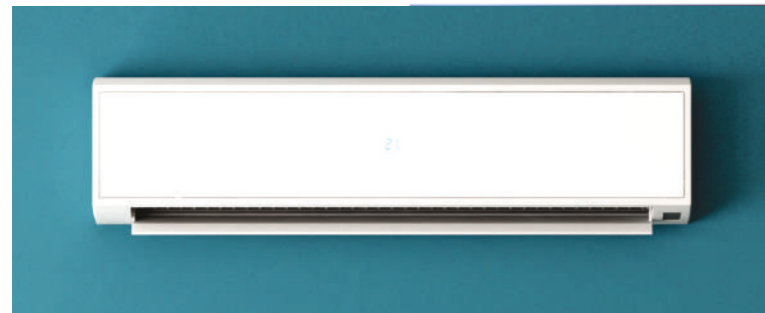

- Extremely high density
- Lightweight build
- Highly versatile
- Sound proof
- Shock absorbents
- High indentation load deflection

08 | THERMBARRIER TUBES

Premium performance pipe insulation offering lower installation costs and maximum energy savings

THERMbarrier

Application

Copper pipe insulation of internal and external units • Chilled and hot water pipes • Oil and Gas pipes • Pharmaceutical, food and beverages industries. • Hospitals

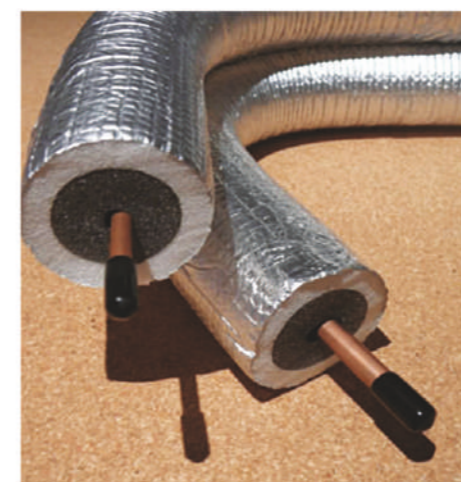

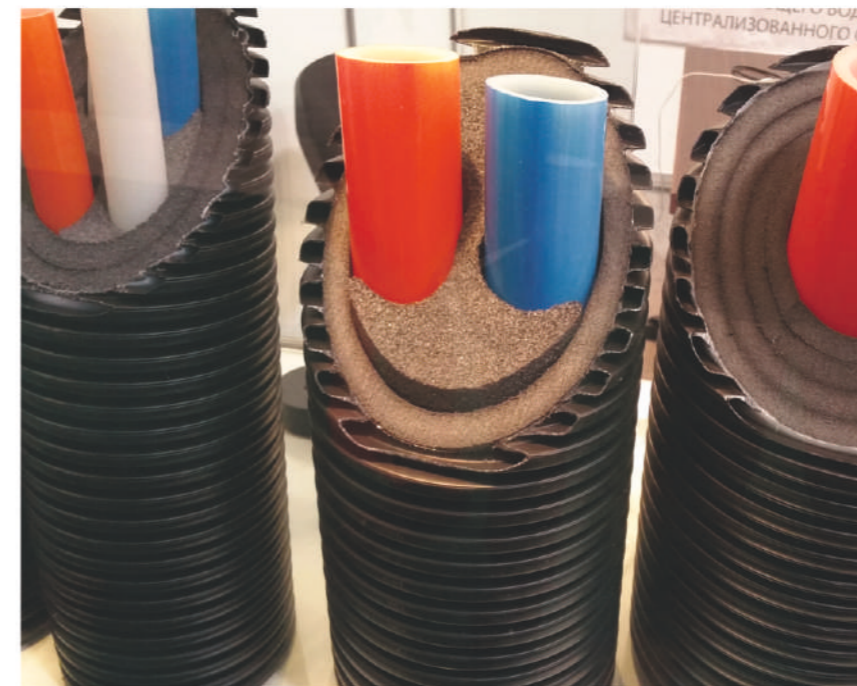

Features

- Easy to install • Provides heat and sound insulation of the area it is applied • Close cell structure • Low heat permeability
- High resistance against water and moisture • Oppose high resistance against impacts • Lightweight, elastic and durable
- Hardwearing • Odorless • Washable • Antibacterial and hygienic
- Environmentally friendly, does not contain CFC & HFCF • Soft and flexible

Product Range

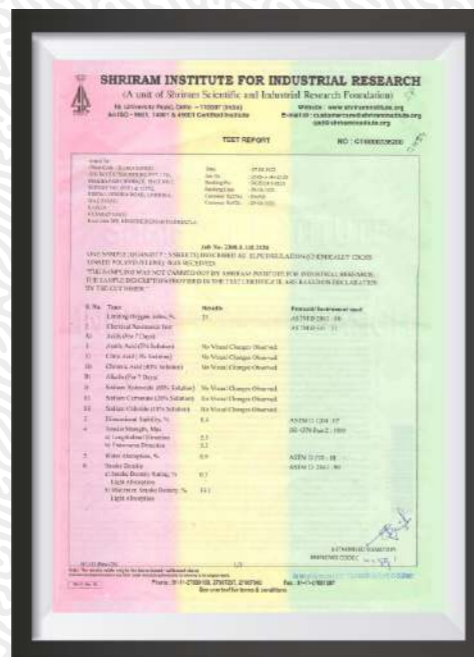

- Outer surface shaped optionally (pyramid shaped) • Production in the required density and wall thickness (I.D. and O.D.)
- Film and foil laminations shapes in different types • B-1, B-2, F/R (flame retardant)

THERMbarrier Tubes

CPP film

CPP Film Technical Specifications

Properties	Test Method	Unit	Typical Value
Thickness	D-375	Micron	18 to 80
Film density	D-1505	Gm/cc	0.91 / 0.95
Grammage	D-2673	Gms/Sq.mtr	16.38 to 76
Treatment level	D-2578	Dyne/cm	38 to 42
Coefficient of friction	D-1894	N/A	0.16 to 0.25
Heat seal initiation temperature	F-88	±2 C	95 to 130

Made From FDA Approved Polymers

09 | TRANSPARENT CPP FILMS

Description

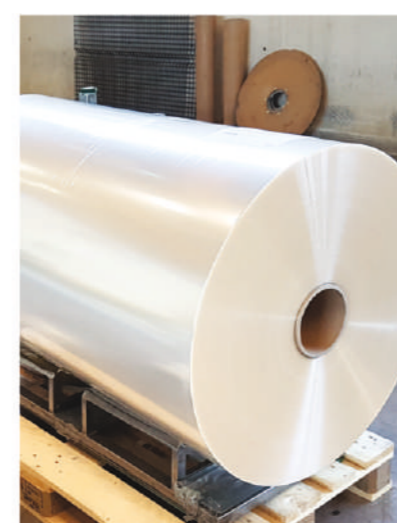

GC-CPL is Co-extruded transparent films with one side corona treated and other side sealable.

Applications

Noodles packaging • Shampoo packaging • Pasta packaging • Dry fruits packaging • Snacks foods • General food pack

Features

Transparent, hygenic, dust free & non toxic • Good optics • Consistent slip • Good machinability • Good hot tack • Good seal integrity

METALIZED CPP FILMS

Description

GC-CPM is Co-extruded transparent for metallization. It is one side corona treated and other side sealable. To be metallized on corona side.

Applications

Namkeen • Pan masala • Candy

Features

Excellent mechinability • Excellent sealing strength • Superior metal anchorage

WHITE OPAQUE CPP FILMS

Description

GC-CPL is Co-extruded white opaque film with one side corona treated and other side sealable

Applications

Biscuit • Pouch • Ice candy • Sanitary pad • Soap • Diapers

Features

Excellent gloss & improved opacity • Consistent slip • Good mechinability • Excellent sealing integrity • Whiteness eliminates the need for white ink • Excellent hot tack

BREAD OVER WRAP CPP FILMS

Description

GC-CPBR is Co-extruded transparent CPP films one side corona treated and both side heat sealable

Applications

Bread Packaging

Features

Good optical properties • Low slip for high speed packaging • Excellent machinability • Excellent hot tack

RETORT CPP FILMS

Description

GC-CPL is Co-extruded transparent CPP films one side treated for aseptic / retort packaging

Applications

Ready to eat food • Masala pack • Meat pack • Microwave • Hot filling • Corn packaging

Features

Excellent sterilization performance • Excellent lamination adhesive anchorage • High seal strength

PEELABLE CPP FILM

Description

GC-ATFG our peelable CPP film is an co-extruded polypropylene film one side be designed for aseptic / retort packaging as the sealing layer, the other side treated with corona to be laminated with other material.

Applications

Ready to eat food • Masala pack • Meat pack • Cold filling

Features

121 °C resistant for 45 min • Cold resistance by -10 °C • Lidding cup, box, tray with PP material
• Easy or hard to peel off

ANTIFOG CPP FILM

Description

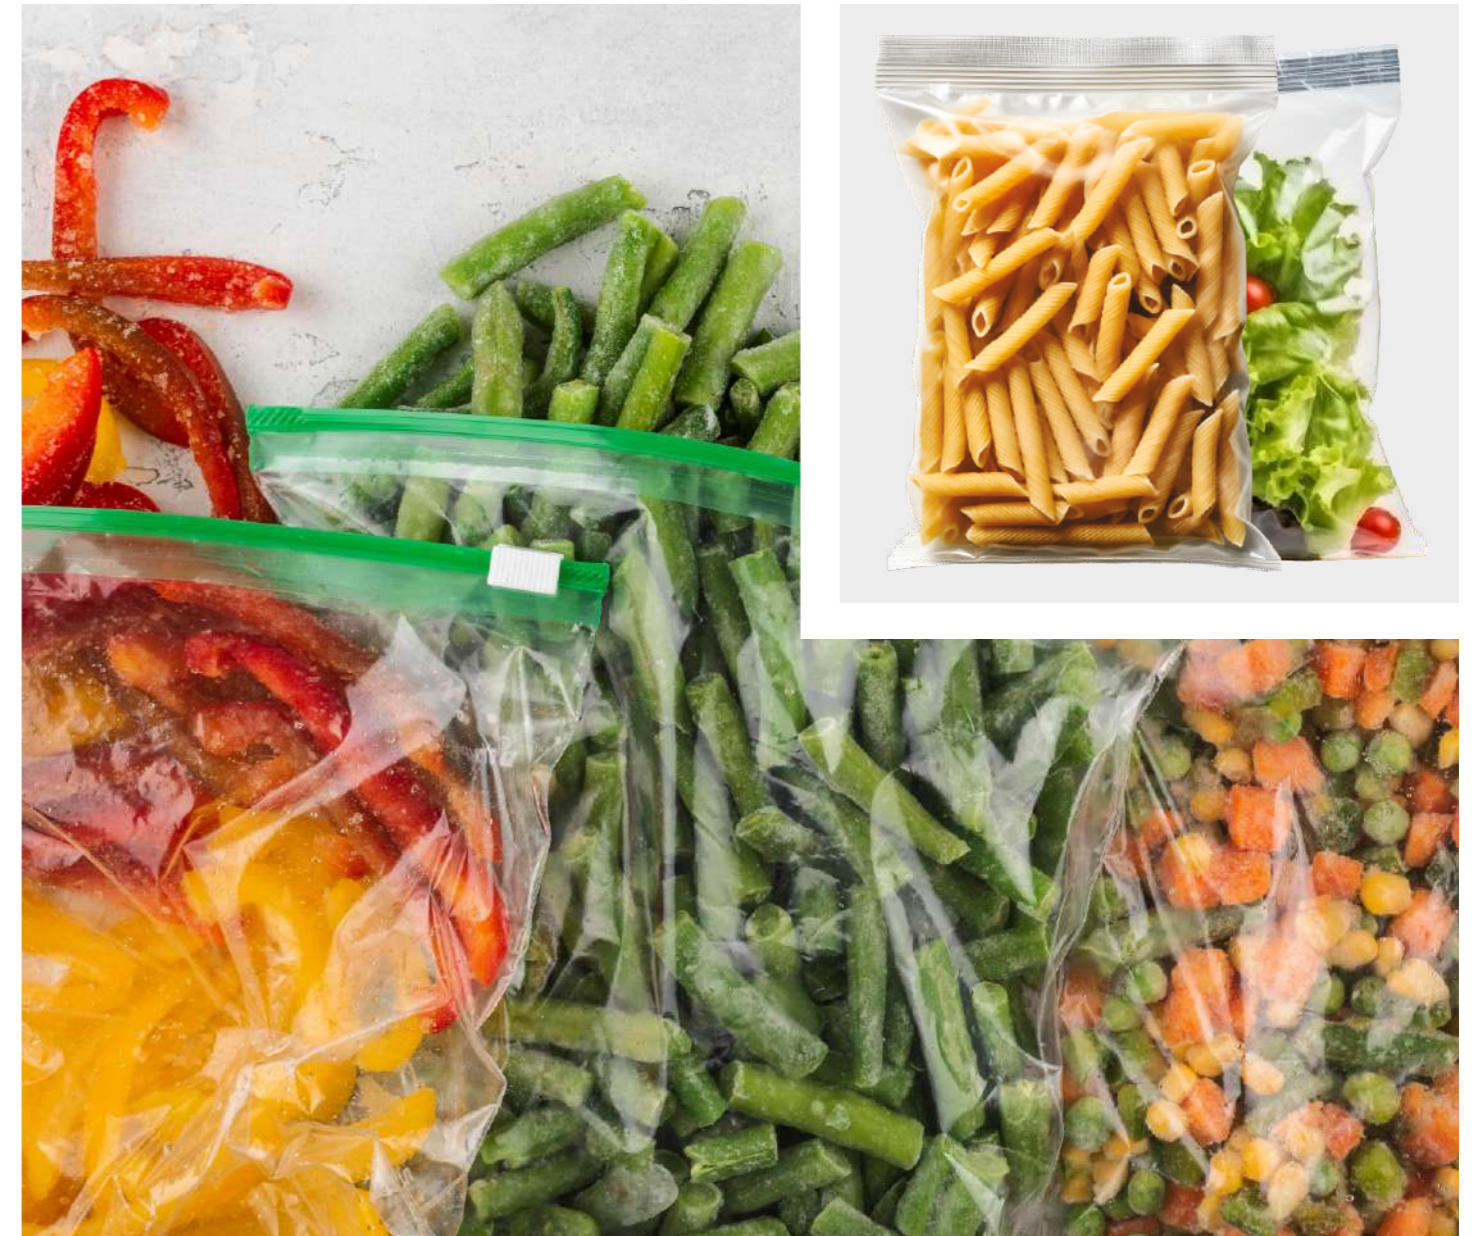

GC-ATFG our CPP antifog lamination films efficiently prevent misting of transparent lidding and are suitable for numerous peelable and lock seal applications. Typical applications are fresh vegetables, microwave dishes, meat and convenience food. The demands on quality by the consumer are high; a clear view of the product - despite closed container - as a convincing argument for freshness. Unique product characteristics without compromise.

Applications

Ready to eat food • Masala pack • Meat pack • Microwave • Hot filling • Corn packaging • Cold filling

Features

Earlier sealing • Good sealing window • For different sealing application with the advantages of high seal integrity
• Film bond are maintained reaction when laminating, imprinting or sealing.

METPET FILM

Description

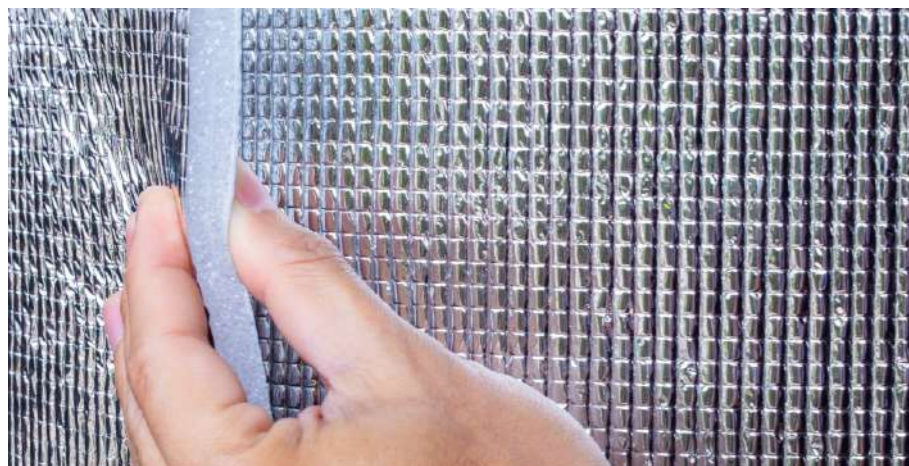

GC-MTPT our PE coating packaging film is an untreated metallized PET film coated transparent PE film that combines high strength and durability (2 ply), good dimensional stability and excellent barrier properties. Our PE coating packaging film maintains these characteristics and is also hot melting treated on one side to enhance adhesive to other materials.

Applications

EPE foam • XLPE foam • Rock wool • Glass wool • Air bubble reflector insulation • Nitrile foam rubber

Features

Hot melting provides good surface adhesion for other materials • Can be pested or laminated using methods suitable for hot melting treated polyester • Excellent handling characteristics • Available in special grade suitable for lamination.

ALUMINUM FOIL

Description

GC-AFIM is Combine with aluminum foil laminate with pet and coated with PE (3 ply). It is economical solution for a wide range of industrial, manufacturing, packaging and consumer application. Such as for industrial sheds, commercial buildings, home insulation, roof insulation, packaging, material to the sensitive products

Applications

EPE foam • XLPE foam • Rock wool • Glass wool • Air bubble reflector insulation • Nitrile foam rubber

Features

Strong at high temperature • Good embossing performance • PET + Aluminum foil + PE

MEDICAL GRADE CPP FILM

Applications

Syringe packaging • Operation blade packaging

Features

Excellent sterilization performance • Good optics • Good mechinability • Good seal integrity

Available Colors

STEEL COIL & CABLE PROTECTION SHEET

Applications

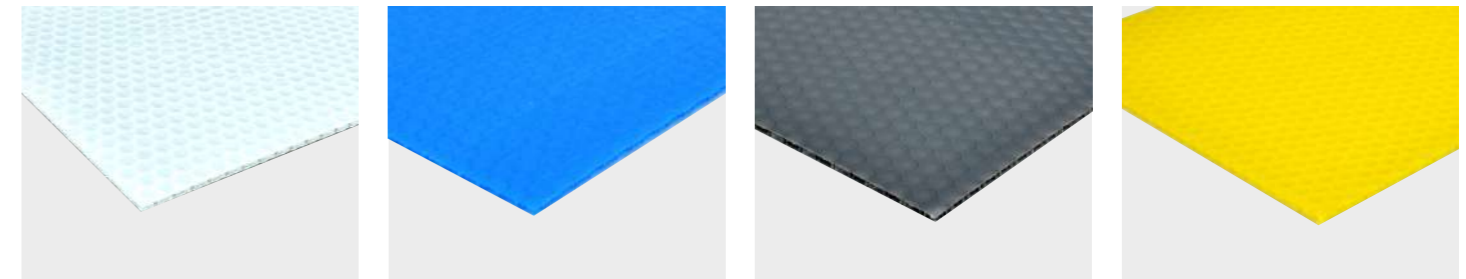

Steel coil wrapping • Cable wire drum wrapping • Metal packaging • Separator part • Automobile packaging

Available product range

No.	Thickness (mm)	GSM	Width & Length
01	2mm to 5mm	125 GSM to 2000 GSM	As per you requirement

Width available : Upto 2400mm | Standard size : 1220mm x 1830mm | Roll form and sheet available

Available product range

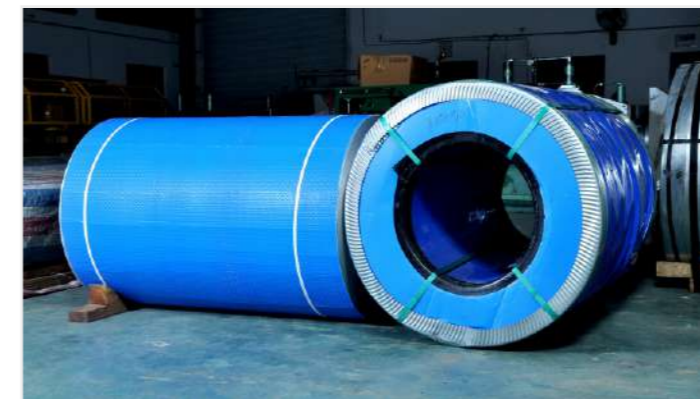

White

Blue

Grey

Yellow

BUBBLE FLOOR PROTECTION SHEET AND ROLL

Applications

Bubble floor protection is used for tiles / marble protection during the work of colour and furniture of residential house, offices, showroom, etc.

Available product range

No.	Thickness (mm)	GSM	Width & Length
01	2.5mm / Customisable	125 GSM to 2000 GSM	As per you requirement

Width available : Upto 2400mm | Standard size : 1220mm x 1830mm | Roll form and sheet available

Note : Sheet size & colour can be customize

Goldcoin
Abrasive

Goldcoin Abrasive Pvt. Ltd.

Goldcoin Abrasive being under the umbrella of Goldcoin Group is into manufacturing of a complete range of Scrub Pads, Abrasive Pads specifically are used for all household cleaning as well as industrial applications. These products are being manufactured by hi-tech Air Laid Technology with a state of the art manufacturing setup and under very strict production & quality control measures.

10 | GLORIOUS HOUSEHOLD PADS

Ideal for effective cleaning of any stain and germs from countertop, stainless steel or ceramic surface

Scouring pad sponger wipe high quality sponge, pliable scouring pad, let you enjoy a cleaning kitchen life.

Benefits

- Resist sponge odors, staining and crumbling caused by bacteria
- Multipurpose powerful cleaning action
- Combines powerful cleaning action with less scratching
- Antibacterial
- Flexible and comfortable
- Helps clean stubborn stain and still safe to use on non-stick surface

Application

Stainless steel sinks • Ceramic surface • Kitchen work top, utensils and equipment • Enamel basin, bath and chrome tiles

HAND PADS

Size	Thickness	Colour
75mm x 100mm Customisable	10mm - 25mm	Green / Red / Black

Features

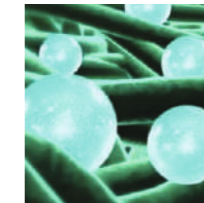

High quality nylon fibre pads

- Anti-bacterial formule
- Flexible and soft scrubbing

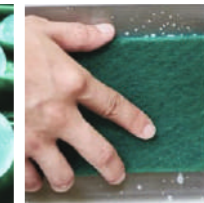

Application

Kitchen work tops, utensils & equipment

- Stainless steel sinks
- Enamel basin, baths and chrome tiles

Durable & Effort saving

Excellent surface effects

Strong flexibility & easy use

Powerful cleaning

SPONGE HAND PAD

Size	Thickness	Colour
75mm x 100mm	5mm - 10mm Nylon pad	Green pad with yellow sponge

Features

High quality nylon fibre with soft sponge

- Soft cleaning with sponge, heavy stain cleaning with scrub
- Ceramic surfaces • Non-stick pans
- Natural cleaning solution works on everything from your stovetops to your countertops

Fume hood is more suitable

Cleaner stove table

Does not hurt pots and bowls

Special for oil cleaning

SPARKLE

Size	Thickness	Colour
75mm x 100mm Customisable	10mm / Customisable	Green / Customisable

Features

- Easy use and strong flexibility • Powerful cleaning
- With silver stain cutters • It has every layer uniformly distributed abrasive
 - Silver refers to colour only as a visual cue of presence of Alox.

ANTI BACTERIAL

Size	Thickness	Colour
75mm x 100mm Customisable	10mm / Customisable	Green, Black, Red and Blue

Features

- Prevents germ growth
- Reduces residual of ad smell • Helps remove tough stain like grease
 - It has anti-bacterial activity that arrest bacterial growth which reduces bad smell by 95% • Superior cleaning

HEAVY DUTY

Size	Thickness	Colour
75mm x 100mm Customisable	25mm / Customisable	Red, Green, White and Customisable

Features

- Powerful cleaning on sticky stain
- Heavy duty cleaning in utensils like tava, kadai, pressure cooker and etc.
 - Powerful action on sticky stain.

NON-ABRASIVE WHITE-PAD (Non Scratch)

Size	Thickness	Colour
75mm x 100mm Customisable	25mm Customisable	White

Features

- Made of scratch free material • Protects your delicate items
- Best for cleaning mirror, Non stick pans and delicate surface / items • Also used in automobile cleaning
 - Tiles grout cleaning

TILE BRUSH (Bathroom scrubber)

Size	Thickness	Colour
4.5" x 6.5"	22mm x 25mm	Green, Red, Black and White

Features

- Thick pad with handle
- Unique triangular head to help reach difficult areas
 - Best for cleaning floor and bathroom tiles

ArmourX™

Industrial Abrasive Pads

11 | G-747 MEDIUM ALO HAND PADS

Product code	Grit	Colour	Size
G-747	Very fine	Maroon / Green	150mm x 230mm

Heavy duty ALO medium tan handpads for hand sanding & machine sanding applications

Features

- Premium quality Nylon fiber
- High performance ALO grain
- Synthetic water proof resin bond
- Multi-coat
- Superior finish

G-644 MEDIUM COURSE HANDPADS

Product code	Grit	Colour	Size
G-644	Fine	Maroon / Green	150mm x 230mm

Features

- Tough nylon fibre high strength
- Synthetic water proof resin bond
- Superior finish

Benefits

- Long lasting
- Suitable for deburring
- Polishing and finishing of aerospace components

G-748 ALO ULTRAFINE HAND PADS

Product code	Grit	Colour	Size
G-748	Ultra fine	Maroon / Green	150mm x 230mm

Medium duty ALO Ultra fine hand pads for hand sanding & machine sanding application

Features

- Tough nylon fibre high strength
- Synthetic water proof resin bond
- Superior finish
- Final finish on wood / metal / acrylic

G-746 H HEAVY DUTY (Extreme hard)

Product code	Grit	Colour	Size
G-746	Medium	Maroon / Gray	150mm x 230mm

SILICON CARBIDE IN MEDIUM GRIT

Features

- Premium quality Nylon fiber
- Synthetic water proof resin bond
- High performance ALO grain
- Single coat
- Excellent finish
- Blending deburing
- 2 x life
- Removes rust and oxidation

ARMOURX FLOOR PADS

Product availability

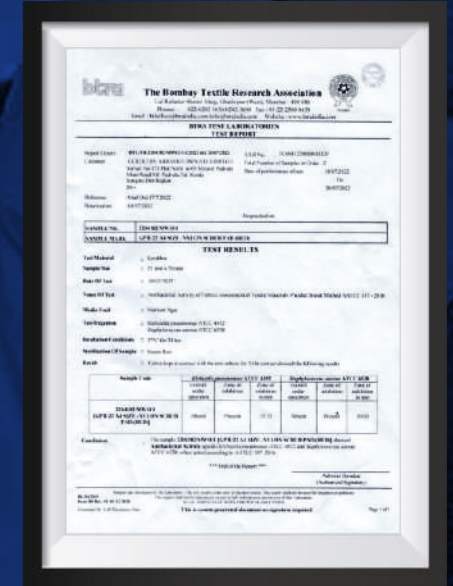

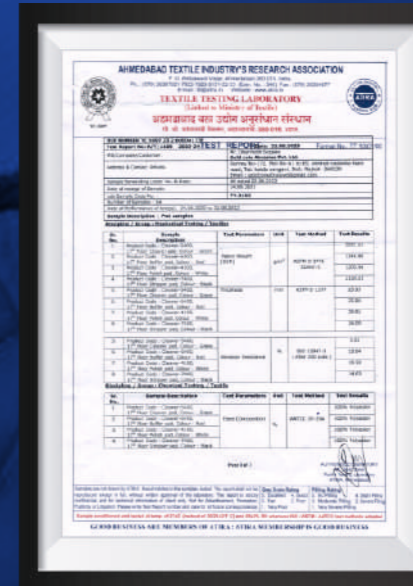

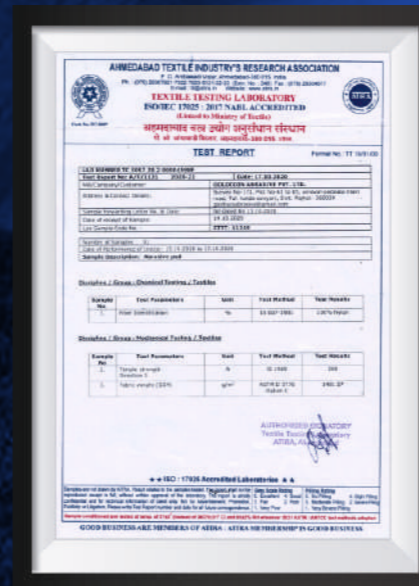

Product type	Brand
Black stripping pad - 7400 Heavy-duty scrubbing Suitable for rough industrial floors	Armourx floor pad Black
Green cleaner pads - 5400 Wet and heavy-duty scrubbing pads Suitable for irregular concrete floors	Armourx floor pad Green
Red buffer pad - 6400 Dry buffing and spray buffing on all types of floors Light scrubbing on marbles	Armourx floor pad Red
White polish pads - 4100 Dry polishing and polishing with mist. Imparts highgloss on marble and granites	Armourx floor pad White

Features

Made from high strength non woven abrasive web, for cleaning and maintenance of floors • Runs at 175 to 350 RPM • Can be used along with alkaline cleaner solution

Goldcoin Abrasive Wheels

Goldcoin abrasive wheels specializes in production of non-woven polishing wheels for industrial use. They are manufacturing and supplying abrasive products and grinding wheels that are engineered to perform optimally in complex and challenging applications.

Armourx Products

Abrasive wheels are rotating wheels made of abrasive particles bonded together to form a solid, circular shape. They are commonly used in industrial applications for cutting, grinding, and polishing a variety of materials, including metal, stone, and concrete. The abrasive particles on the surface of the wheel wear down the material being worked on, creating a smoother surface or a desired shape. Abrasive wheels are available in different types, shapes, and sizes, and are selected based on the application and the material being worked on. Goldcoin Abrasive Wheels specializes in producing Non Woven Polishing wheels, which are made by bonding synthetic fibers with abrasive particles to create a durable and flexible wheel for polishing and finishing metal surfaces.

Application

It is used for finishing and grinding of such hardware work pieces as castings, manual tools, knives and stainless products, as well as clearing of welding points and finishing of auto and motorcycle fittings.

15 | Total Innovative Packaging Solutions

Goldcoin Group has been into the manufacturing of Rigid & Flexible Packaging products since 2005 and has gained its market position as one of the leading quality manufacturers in India. We have realized over these years that packaging is one of the most important component for any product to be successful as it protects, preserves and delivers them with ease and convenience. With the vast experience over these years and also the feedback and information from the market, we have gone ahead with the forward integration in terms of putting up converting/fabrication units across various locations in order to cater to Electronics, White goods and Automobile, Renewable energy & Insulation giants.

We started this exercise 10 years back and have been successful in installing multiple converting/fabrication units across India and continuously striving to expand our base in other territories as well.

Today, we are proud to position ourselves as just not only product suppliers but also complete packaging solution providers where we assist our customers based on their functional requirements, to develop customized products suiting to their specific applications. With this our customers just have to discuss their requirement and we deliver them, through our expertise, total solution for their packaging needs.

With a wide array of 15 varied products, we are capable of developing the complete solutions inhouse, thus providing our customers with reliable, robust and functional packaging products.

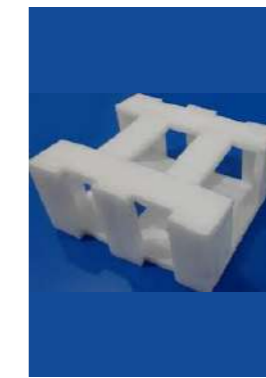

Our vision is to be in the proximity of all the major manufacturing giants, there by committing them and delivering the right solution with Just in Time concept to their door steps.
